EXPERIENCE PAYS OFF IN THE LAB & IN NETWORKING

Texas A&M University is renowned for its highly motivated students and faculty, world-class research facilities, and outstanding undergraduate programs. Take advantage of all three resources by participating in a Research Experiences for Undergraduates (REU) program and further leverage them by joining the Summer Scholars Program, which helps ethnic minority REU students across Texas A&M find common ground as a community within a community.

THANKS

We’d like to thank the following sponsors of the REU Summer Scholars program:

Texas A&M University
Office of the Vice President and Associate Provost for Diversity Honors and Undergraduate Research

EXPERIENCE PAYS OFF IN THE LAB & IN NETWORKING

A GRAD SCHOOL BAROMETER

These days, it’s nearly impossible to be admitted into graduate school without some form of undergraduate research training. In addition to a top-quality research experience, REUs offer a clear window into what life as a graduate student is like, helping participants determine if they have what it takes to make it in grad school.

The REU Summer Scholars Program is a university-wide optional supplement to your summer research undergraduate experience intended to help ethnic minority students build a community.

APPLY FIRST, THEN EMAIL US!

REU programs are highly competitive, often attracting applicants worldwide. Hundreds of students might apply for any given program, but only a dozen or so will be hand-selected by program directors to participate — a prerequisite for Summer Scholars involving two simple steps:

1. Apply directly to your REU program of interest
2. Once accepted, send an email to REU@science.tamu.edu to let us know you’re interested in joining Summer Scholars

begins June 2015

LUNCH AND LEARN

Summer Scholars are encouraged to attend free informal lunch discussions (see schedule online) featuring university administrators and other special guests who present on a variety of topics and focus areas, including:

- Finding money for graduate school
- Effective presentation skills to get the next job, grant or internship
- Cultural connections such as Hispanic and Black Association of Former Students Networks
- What do to for fun? on campus and in the College Station/Bryan area

GET WITH THE PROGRAM

Go beyond the research-relevant basics and gain exposure to professional development, social activities, and other events equally vital to your professional and personal growth.

NETWORK WITH THE BEST

As a Summer Scholar, you will be provided with opportunities to network with top Texas A&M administrators and programs, including:

- Vice Pres & Assoc Provost for Diversity
- Black and Hispanic Student Associations panels
- Honors and Undergraduate Research
- Education Development
- Vice President for Student Services
- Vice President for Finance & Administration
